Comments:

The Forest Service should reduce group size limits accordingly to protect the wilderness. The plan must address feces contamination in lakes and streams on the Beartooth Plateau. Vacant grazing allotments should be closed. No trail construction or reconstruction. I support the recommendations in Alternative D of the Revised Draft Forest Plan, but this must be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range. The plan should also prohibit any motorized and mechanized uses.
