I started college in 1968 every environmental problem known was presented to me and they knew everyone then to date not one has been addressed and the major driving factor to all of them is overpopulation. There is not one place on Earth that you can dissect to that infinitesimal differential unit that does not have human made toxins in it.. The president Trump is an uneducated low grade criminal idiot that Bill Gates continually has to council on the difference between HIV and HPV. Someone needs to council Bill on his grievous mathematical error in the calculator of this computer for y to the x ,0 0 is not 1 but e to the 0 $\ln 0$, a value of minus infinity like Trump's and Rush's IQ. In short what ever you do the great wildlife will not survive and integral calculus is not necessary it is simple, human encroachment is the problem. Rush has his PHD in climatology from Trump University, does anyone in the trump administration have a degree from an accredited university (of course not all are Kleptocrats)? . Nothing you do is based on science but a total denial of it. The great irony is Trump is sworn in on the Lincoln bible. Lincoln was an atheist and did not beleive in prayer, the scriptures or that god was on your side. Public policy can not be based on the lies of Jesus, Christianity and the bible. The bible, Christianity and the pope's claim be fruitful and multiply is the complete problem . Generally speaking popularity and correctness are inversely related although Trump lost the popular support, does not have it now ,Russian and NRA fraud and money laundering in the election and yet you force his idiot criminal policies down the throats of the people of this country and do nothing in their interest or the interest of preserving the environment. The interest is done in is in the 400 multi- trillionaires that already own everything and corrupt everything, the GOP are their whores. Is it that you secretly know the battle is lost and let us increase the environmental demise and put mother nature out of her misery.
