Comments:

My concerns about the plan include:

Too many humans and live stock which will cause widespread environmental destruction. These large group sizes are too big.

Human and animal feces containment is not being addressed. Again, too many people and live stock.

Close vacant grazing allotments in the Wildernesses so they can be naturally healed.

Eliminate trail construction or reconstruction in the currently trailless areas so they can regenerate from past abuse.

I do support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan. But, they must be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommended Wilderness in the final forest plan.

Prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.
