Dear Custer Gallatin Forest Plan Revision Team

The Custer Gallatin's headwater streams provide clean drinking water, abundant fisheries, and critical wildlife habitat. They also have enormous recreational value. The new forest plan must protect our essential outstanding wild rivers by adding Taylor Fork, South Madison and Hellroaring Creek to it's list of 30 wild and scenic recommendations. It must also support the health of all waters by aggressively protecting riverside riparian forests and conducting a new watershed condition assessment.

In addition...

I would like to keep access for all different interest groups but I would like to move certain recreational use areas where they do not affect then wintering ranges of animals. Snowmobiling areas such as in Taylor Fork I think disrupt Elk. I would move snowmobile areas to where they have lesser impact.
