Comments:

I spent a large portion of my youth backpacking around various parts of this beautiful country, Vermont and South into Pennsylvania, then out west on the Cascades trails, Northern California and then into Idaho and Montana. It is so important for these areas to be protected, once opened they will never be the same. Off road vehicles destroy the trails and wildlife habitats. We must keep what is left of our wild country a safe place for the other creatures we live with. Please keep vehicular traffic, even wheeled traffic like bicycles out of this beautiful country. Please protect as much as you can as so much is already being destroyed and lost. Thank you,

Suzanna Davis
