Comments:

Moving to Bozeman 29 years ago was a dream come true, precisely because of Montana's wild and scenic landscapes. For current and Future generations, it is essential that such areas be protected from harm. please resolve to manage as wilderness as much of the CGNF as possible, as only this will prevent permanent degradation of the remarkable wildlife populations, clean water and aesthetics of these priceless but shrinking lands. The highlight of my time in Montana has been exploring and experiencing with family and friends the pristine natural world here. I am especially fond of, and concerned about, the Gallatin Range, the Crazy Mountains, the Absaroka/Beartooth Ranges and the Lionhead area; I hope that they will be protected to the greatest extent possible, to ensure that Montana remains "The Last Best Place".

Bruce Granger
