Comments:

Dear Supervisor of the Custer/Galliton Nation Forest:

This is a follow up comment on the Draft Forest Plan.

My follow up comments come after fully reading the 246 page plan in its entirety.

After fully reading the purposed plan options, I would request Plan "B" or "E". I would prefer to see either of these plans implemented in the future due to the fact these two options represent the least drastic change from current managements of our local forests. Continuation of current policy still allows road and trail access to a greater number of forest users than options "C and especially option "D".

Option Plan "D" would be a drastic change in policy for recreation uses of our forests. This plan option would immensely increase road less access with Primitive and Semi-Primitive Non Motorised use.

I am strongly encouraging the Forest Service to tread slowly into drastic changes to our forests that would deny a large number of people who use the lands to recreate on but depend on more road and trail access to remote areas of our forests.

Sincerely

Craig E. Hash
