Comments:

I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan and suggest adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan.

The plan should also absolutely prohibit all motorized and mechanized uses (and any other activities not consistent with wilderness protection) and provide additional direction for administering the Absaroka-Beartooth and Lee Metcalf Wildernesses.

The current wilderness management plans allow destructively large groups of up to 25 head of stock (horses and mules) and 15 people in most areas. Research shows that impacts increase significantly when group-sizes exceed eight head of stock and 12 people--the Forest Service should reduce group size limits accordingly so as to protect all Wildernesses on the forest from harm. Further, the forest plan should put an end to ecologically destructive fish stocking in naturally fishless wilderness lakes, which significantly alters the areas' natural conditions.

Thank you for your time and attention to this matter and for doing all you can to protect our precious remaining wild lands.
