Comments:

I believe the Gallatin Range, Custer Gallatin National Forest can best be protected for posterity with Alternative D of the draft Forest Plan. However, it should be improved by adding the entire 230,000 acres of wild and roadless land. All motorized and mechanized uses should be prohibited.

The Forest Service should reduce the permitted group use size to no more than 12 persons and 8 animals.

I believe there should be no fish stocking which is destructive to the wilderness.

And the problem of human and animal feces contamination of the lakes and streams must be addressed. The end of fish stocking will aid in this effort. Thank you for considering the protection of wildlife and wild lands as the highest priority.
