Comments:

Protect this land. It is a crucial section of a natural easement for migratory wildlife. The ranchers, the environmentalists all understand how it works and why it is fundamental for the ecosystems to remain undamaged to sustain themselves.

The Trump Administration has single handily scoured the EPA clean of regulations to enrich multi-national corporations who do not bank in America. These corporate parasites get Trump and Republicans to rob public land like a fat, thief in the night to enrich the brief, thieving lives of a corporate parasite who then tosses the Republican a bone. Oh, lucky day.

Protect OUR land. Send these men home with their corporate benefactors. These men demand your allegiance while they bank tax free in the Bahamas. They just steal. ENOUGH. Stand UP America and grow a spine.

Wouldn't that be a big day!
