Comments:

Dear Supervisor Erickson,

1.The protection and conservation of aquatic species of concern for the C-G NF would best be met by implementing Alternative D.

2.ALL 12 of the desired conditions for Watershed and Aquatics would best be met with Alternative D. The Final Plan needs to identify to what extent each alternative would result in not fully and completely meeting the desired watershed conditions.

3.The Goal of reintroduction of genetically pure native fish species in all of their historic range and agreed locations in the C-G NF would best be met with Alternative D. The Final Plan needs to quantify how the Goal would be limited and/or not met without the Alternative D objectives 01, 02 and 03.

Please ensure that the Final Plan quantifies how protection, desired conditions and Goals would be compromised if Alternative D is not the alternative to be implemented.

Sincerely,

Don Jackson
