Comments:

Dear USFS Representatives,

The Crazy Mountains are a crucial, unique habitat.

The Pryor Mountains recommended wilderness areas need protecting.

The Absaroka Beartooth area is another unique gem - on the planetary scale!

Please implement the Gallatin Forest Partnership agreement and protect all current recommended Wilderness areas. Furthermore, all current roadless areas in the public domain should be kept that way and managed as potential wilderness.

No motorized use should be allowed in any recommended Wilderness - the consequences of such traffic are irreversible.

Biodiversity is collapsing; we have lost over 1 million species in the last decade! Protecting our remaining wild places should be a public priority.

Vicki Moore
