Comments:

I urge you to prohibit all motorized and mechanized uses in the Gallatin Range and other critical wildlife habitat across the Custer Gallatin National Forest, and any other activities not consistent with wilderness protection in the Recommended Wilderness areas so as to preserve their wilderness qualities.

The plan must also address the issue of human and pack animal feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness. Eliminating fish stocking would likely help, but additional measures must be included.

What about the Absaroka-Beartooth and Lee Metcalf Wildernesses? Large groups of stock and people will damage this area. Again, I oppose fish stocking. Naturally fishes lakes are balanced in that condition and should be left alone.
