Comments:

Hello

I am writing to object to any mining or drilling or other development that would damage this pristine wilderness area.

The thought of bulldozers & other equipment being used to drill erect metal derricks & to dig holes in that ground makes me anguished & sick!

It is not like the damage will be restored by the greedy corporations either!! It is perhaps not possible to restore those lands even if attempts were made!

The overriding issue is the need to stop searching for & using fossil fuels and for Americans & others around the world to convert to non-fossil fuels.

I believe in the astute scientists who predict horrible damage to our planet in a very short time and within my lifetime! I am not sure that we can do it in time, but we must try!

Very desperate power brokers in the fossil fuel industry, loathe to give up money, and the power & influence they wield, are exerting undue influence to drain all fossil fuels left before they are exhausted. If we have not converted to replenishable fuels by then, our folks will be in a terrible mess!

Please note that these lands were lovely when we held a family reunion there years ago. I would hate for my family & others to lose the opportunity to see these lands as the Good Lord made them!!

Please do let these lands at issue remain as they are without harsh & gaping holes & metal wreckage! Please do not let the drillers inside! Thanks, for taking & seriously evaluating my request to leave these lands as they are!!

Jean Langford, BSE, MA, JD, Huntsville in Alabama
