Comments:

I support option D. As much as I like to mountain bike in the mountains, I think it's more important to preserve and restore the forest as much as possible for the future. I like that option D takes into account all aspects of the forest, from air quality to flora, to fauna, to preserving and respecting Native sites. As humans, we need to take responsibility for caring about our planet, and not putting our recreational needs ahead of the rest of the earth. Thank you for considering our comments.
