Custer Gallatin National Forest Plan

I submit this general observation in support of as much wilderness designation and protection as possible for the Custer Gallatin National Forest.

We are all in this together! We individually cannot limit our support of wilderness to the area closest to where we happen to live. Wilderness is a national resource, owned by all the people of the nation rather than just local users or those who benefit from the outdoor recreation business generated by local wilderness. Compromising the size down, down, down, spoils all future options for wilderness as land is developed for other uses. Good luck to all of us - and the best luck of all would be a decision supporting the most wilderness possible.

Please protect our watersheds, wildlife, wilderness by deciding on Alternative D with AT LEAST 230,000 acres of wilderness with full, legal protection.

Sincerely,

Anne Millbrooke
