Comments:

I support designating the maximum area proposed in the Gallatin Range as wilderness. It is a special area that should be preserved.

I also believe based upon personal experience that mountain biking is not compatible with horse use. I met a mountain biker going at a high rate of speed on a corner while leading a string of mules and almost lost them all off a steep embankment. It could have killed me along with my horse and mules. They go too fast and are a hazard to people on horses.
