

Dear Custer Gallatin National Forest

I live near Butte, Montana and, because of it's close proximity I make frequent trips to the Big Horn mountains primarily because of my interest in photography. I have made several trips to the area, with other members of the Butte Camera Club, but in the 1990's I conducted cultural research work as a Natural Archaeologist for the Custer National Forest so I have an interest in the history of the region as well. My surveys at that time were of several areas proposed for logging because of incalculable damage because of the cultural significance of the region to native American groups and its unique rugged beauty. I would like to see this area managed under Alternative D. Because I have not seen a significant amount of interest, I do not feel Alternative D would impact the area.
