Comments:

i am in favor of alternative D plan that includes strong standards not wishes.it should include freedom to roam national forest lands,restore viability of bison by connecting distinct subspecies.also,removing all barriers to migration of native species,protecting wetlands,standards for grazing that include all forest land with let down fences implemented.in order to protect our wild sheep there should be no domestic sheep grazing in areas that would harm our wild herds.this is becoming a deadly scenario and is senseless.safeguarding treaty rights and trust obligations should also be included.finally,our public lands and wildlife are america's crown jewels and are the envy of people the world over.protecting that trust is paramount in the views of the american people.politics,corporate greed for a one time bonanza at the taxpayers expense have no place at the table.and it should be noted that recreation,tourism,hunting etc. bring in far more money than grazing does.actually according to government reports grazing costs more money than is ever collected.a smart business man would get out.thankyou
