Hello, I would like to express support for the citizens for balanced use view on this plan revision. I support reasonable protections that best serve the widest range of citizens. This does not mean prohibiting any specific type of recreation in any area. Nor does it mean prohibiting future development of this area. Public land should be managed in the best interest of the public, not a certain group. Public input should be sought at any management plan or change. Decisions need to be made by looking at the landscape level. I have little faith in the federal system following thru with managing this land for our best interest as they seem to always have to small segments if society or special interest groups. I hope they are able to work past that and give everyone a chance to use our land.
