Comments:

As a member of the Buffalo Field Campaign- want to see bison/buffalo protected as a species of conservation concern. They are OUR National Mammal after all!

I want to see barriers that impede the bison/buffalo from migrating throughout centuries old paths to be REMOVED! I do NOT want ANY traps, holding pens set up for the confinement of these iconic animals.

Ranchers and their cattle NEED to STAY OFF and OUT of National Parks and Rangers should NOT work with them on disrupting, harassing bison/buffalo!!! Cattle ARE the EVASIVE species and should NOT be ruining the balance of wildlife habitat!

I OPPOSE of the shipping and slaughter of bison/buffalo and expect the Forest Service, Park Service to PROTECT these animals and others that live in OUR Parks and the surrounding areas. Animals do NOT know or care about boundaries and they MUST be able to move freely to find food, mate and give birth, etc.

What Montana, Wyoming is doing to our NATIONAL mammal is abusive and cruel!!!

I want to see Alternative D improved upon and implemented.

Thank-you!
