Comments:

I do not support further closures. No more wilderness. The negative impact more closures will have on the community and winter tourism will be very substantial. We need to look at opening more area up, it is public land more closures and laws greatly limits the family outdoor experience. Outdoorsmen and women and the number one protectors and stewards of the forests, not legislators. Grandparents won't be able to share the same experiences with their grandchildren due to limited access, or will be in such tightly packed areas the impact to those areas will be far worse than expected. It will also greatly impact jobs in the great state of Montana for miners and loggers and many other service industries.

NO MORE CLOSURES. NO MORE WILDERNESS

Thanks
