Comments:

I am an active user of many of these areas in the Forest Plan Revision area. My main use is through motorized vehicle but also access area by non-motorized means. I am not a local to the Montana area, but make many trips to the area for snowmobiling and off road vehicle opportunities. The motorized use of these areas brings a substantial amount of money into the communities surrounding the forest area. Much more money is brought in though the motorized use of these areas than non-motorized use. Myself and the group i travel with spends upwards of \$50,000 a year in the Bozeman and West Yellowstone areas and we are a small group. If these areas become restricted to our use then we will find another location to spend the money as will many other people like us. That is why i support the "alternative A" - no change.
