Dear Mary,

I know you are going to have a difficult decision on what areas to protect or not in the CGNF. Please remember the Greater Yellowstone Ecosystem is not only of national significance but of international significance. And as a result, I hope you will employ the "precautionary principle" which suggests when in doubt choose the alternative that provides the best protections and least amount of manipulation. Just keep in mind that Wilderness designation is the most secure way to protect lands.

Thanks for your consideration.

Geo. Wuerthner
