Comments:

I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan.

The plan should prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.

Have you ever visited the wilderness and been in awe of the lack of human noise? Just birds signing, the breeze whispering through the trees and the grasses. It's magical. And it's healing. It's in our very basic nature to crave this. A respite from this crazy overdeveloped concrete jungle. We can't keep chipping away at it just to appease a few selfish individuals who want to run rampant over pristine areas with their motorized "sports" vehicles for their own recreation, trampling habitat, alarming wildlife with the noise, and generally leaving litter as some are prone to do, having little or no respect for the environment.
