Comments:

Dear Sirs: I support the Alternative D for the Custer Gallatin Forest Plan Revision, but would like to make sure that your agency understands the following and acts to protect this precious wilderness area. First, the size of group and stock allowed in Lee Metcalf and Absaroken should be reduced. Second, the revised plan should absolutely prohibit all motorized vehicles and mechanical uses. The pollution, noise, and disruption to wildlife from motorized vehicles is incredibly destructive. Third, the entire 230,000 acres proposed to be added to the Gallatin Range should take place. Thank you for your consideration of my comments. Please make the right decisions for this special area.
