Comments:

I support plan D. The Gallatin range is part of a wildlife movement corridor and should not be broken.

This area is vital habitat for wolves, grizzlies, bighorn sheep etc. Recent research shows these species are severely disrupted by bicycle and motorized traffic. My husband and I have hiked and backpacked here for many years. It is difficult to hike on trails rutted by bike traffic. We treasure the solitude and the opportunity to see wildlife in its natural state.
